Comments Report

1.2) Frage1 B

MASTER - LAP

7.1) What I liked:

- -> contribution of the students
- -> very small group size, so we can really interact with each other
- · contributions from the students
- · interactive
- . positive admosphere in the course
- elittle ourse
- discovery a topic within a group
- the small framp size

This course isn't my main subject however 9 enjoyed it and learned quite alot about the different aspects that go into managerial decisions & charge management in coeparations & firms. It was a good learning experience.

- dething students prepar lessons

-> many group tastis & oppostunities for pathicipation

- very practical / hands-on oriented, not just theories

- group site =) small, good working atmosphere
- very practical-oriented tasks
- Course size
- nice studying environment
- approach on several levels to learn, think and discuss was clear agenda throughout the couse
 - · Workshops

> The Course is an enlighten protess and helps page cratically analyse protess and implement themage.

-> contristors and fled bracks from other Students.

- more information about some topics/models in order to apply it properly in practice

^{7.2)} What could be improved?

reconsider group work, after several times, people tend to be less creative and notivated

- mes for grap tasks
 Ly no spert of topics with following presentations for more than two groups
 Ly avoid reductance while presenting the proup solutions
- * preparing the ontribution in a short time was very stressful

-s more specific instructions or goals for the preparation of the individual session. The title itself was too unspecific to understand what the prepared lesson should be about specifically. What are the key learnings we should convey? Also removed in a wint as deadlines?
